

A to ZINC

Welcome *to* AMBICA

Ambica Group : Leading the Way in Zinc Derivatives Since 1960

Founded in 1960 by the visionary Mr. Ramesh Kumar Bubna, Ambica Group has evolved from a dream project in Kolkata into a diversified, distinguished group of businesses.

For over six decades, Ambica has maintained an unwavering focus on quality, commitment, and delivery, establishing itself as a respected, leading manufacturer of Zinc Oxide (white seal & active), Zinc Chloride, Zinc Sulphate and other crucial zinc derivative products.

We produce the finest quality materials, carefully tailored to meet

- Applications of **Zinc Chloride**

Used as a metallurgical flux, battery electrolyte, catalyst, dehydrating agent and in wastewater treatment also applied in medical and dental formulations.

Industries: Batteries, Water Treatment, Medicine, Textile, Metallurgy, Galvanizing.

- Applications of **Zinc Sulphate**

Treats zinc deficiency, supports immunity and skin health and plays a key role in agriculture and industrial applications.

Industries: Agriculture, Animal Feed, Cosmetics, Pharmaceuticals.

the requirements of our esteemed customers in India and abroad.

- Applications of **Zinc Oxide White Seal**

A key vulcanizing agent in rubber and tyres (50–60% usage). Acts as a white pigment (Zinc White) with anti-corrosive properties. Also used in food fortification, dental cement, adhesives, lubricants, and environmental applications.

Industries: Rubber, Tyre, Ceramics, Paints, Cosmetics, Adhesives.

- Applications of **Zinc Oxide Active**

It is a high-surface-area (20–50m²/gm), fine white powder produced via chemical precipitation, designed for superior reactivity, dispersion, and lower dosage. Enhances elasticity, strength, aging resistance and tear strength in rubber products.

Industries: Rubber, Tyre, Footwear.
